

Angelina Souren

Critical thinker with earth & life science background

For general inquiries only: +44 (0)77 2977 5974 | angelinasouren@gmail.com

- ❖ Owner/founder of SmarterScience
- ❖ Company Director for Credabilius Ltd
- ❖ MSc earth sciences, cum laude (distinction)
- ❖ Former Associate Editor for the internationally operating US-based Geochemical Society
- ❖ Former board member for the Environmental Chemistry (and Toxicology) Section of the Royal Netherlands Chemical Society (KNCV)
- ❖ Former board member and member of several committees for the NIMF foundation, a network of women in science and technology
- ❖ Graduate of "Taking the Lead" (NCFE-accredited advanced learners course in community leadership, TakePart context Portsmouth City)
- ❖ Became long-term target of so-called sadistic stalking, including extensive hacking
- ❖ Developed extensive knowledge about **otherisation** (inclusivity and diversity issues as well as the role of neuroscience complemented by knowledge about bioethics angles) as a result, but also because she's been a migrant from the EU in England since the end of 2004
- ❖ Has previously lived in the USA and done fieldwork in several EU countries

In 1997, she set up a small business in Amsterdam with an international team of associates, working for clients who develop and use science & technology knowledge. Her main aims were to do interesting work, support herself and contribute to the success of her clients. She learned a lot in the process. Anyone who's started a business knows that it automatically confronts you with your own weaknesses and forces you to do something about them, but you also learn a great deal during projects.

Angelina is familiar with many different environments. Prior to becoming a scientist, she worked in tourism & hospitality in Amsterdam. She grew up in a retail background. Her parents had little more than a primary school education and she is the eldest of three daughters. She graduated magna cum laude (great distinction) from secondary school, with a science package that contained four languages. Inter alia, she later took a course in free-lance journalism and gained experience with English law.

She is highly versatile and flexible, but became hampered by a controlling and interfering behavioural phenomenon called "sadistic stalking" (also known as "resentful stalking"). This motivated her to start learning a great deal about diversity and inclusivity issues. She then wrote a book about the new eugenics and another one about otherisation. She's penned some flash fiction as well. She knows a few things about rehabbing birds, a journey that she began in the USA in the 1990s. She loves coffee.
